Falls Free Wisconsin

Falls may be common, but they don't have to be a normal part of aging!

The Falls Free Wisconsin Coalition is dedicated to reducing falls and supporting fall prevention and resilience as we age using a collective impact approach. Convened by the Wisconsin Institute for Healthy Aging (WIHA), the coalition is made up of community-based organizations, Aging & Disability Resource Centers, health care providers and systems, local fall/injury prevention coalitions, public safety, community members, and others.

Falls Free Wisconsin Coalition Workgroups

Public Awareness

Share messages and resources on how to prevent falls and increase resilience as we age and encourage others to get involved

Best Practices

Gather and share information (programs, education, coalition development, etc.) with professionals

Advocacy

Advocate for state and local investment in fall prevention, and policy/systems changes

Data Collection & Analyzation

Collect state and county-level falls rates (ED visits, deaths, hospitalizations, cost), and program impact data

Get Involved

- Become a workgroup or steering committee member (1-3 hours/month)
- Participate in quarterly, 1-hour general coalition meetings
- Receive information via a monthly newsletter (minimal time commitment)
- Share coalition resources and information
- Be a source of information and best practices for the coalition
- Support state and local advocacy efforts
